ABOUT THE INSTITUTION

College of Engineering Kidangoor is one among the premier educational institutions in the field of technical education, under the Co-operative Academy of Professional Education (CAPE), a Government of Kerala establishment. Started in 2000, the quality of performance and training is widely accepted and appreciated, which is further reiterated with the records set every year in the higher rate of university ranks and campus placements with MNCs. The institute is ISO 9001:2015 certified and continues to maintain the highest standards in imparting quality education.

Affiliated to the A P J Abdul Kalam Kerala Technological University, presently the institution offers B.Tech courses (ECE, CSE, EEE, CE & EL) and M.Tech course (ECE) dedicating about 300 quality professionals every year for the nation building. The college, now two decades old has already established itself as one among the leading Engineering Colleges in Kerala.

ABOUT THE PROGRAMME

Growth of a nation and the development of infrastructure should not adversely affect the society. The development plan should not adversely affect the population in the long run and should be in line with sustainable development. The infrastructure development have the potential to impact the environment by way of flooding, pollution of soil, water and air, erosion, ecological disorder, various environmental issues and natural hazards. As responsible engineers we should be able to minimize the adverse impact of such developmental activities and use natural resources to the minimum possible. The energy needs of growth should be green and renewable in nature. The objective of this training programme is to provide an overview on various issues and their solutions for sustainable infrastructure development.

COURSE CONTENT

- Environmental impact of infrastructure & mitigation measures
- Sustainable development
- Water pollution & water quality management
- Impact of development on natural resources
- Importance of flood modelling
- Relevance of environmental impact assessment study
- CRZ rules on development

ABOUT THE DEPARTMENT

The Department of Civil Engineering was established in 2010 with well qualified faculty members and is equipped with state of the art laboratories. The Undergraduate Program offered by Department of Civil Engineering is accredited by the National Board of Accreditation (NBA). The department is always blessed with industrious students of high calibre, well qualified faculty and good academic records. The department also encourages its students to engage in co-curricular activities essential for holistic development, nurturing of team spirit, developing organizational skills and motivate students for higher studies.

Our Vision

To be a leading centre of eminence, by providing competent Civil Engineering professionals, with state of the art knowledge of the industry and commitment to sustainable development of the society.

Our Mission

To provide quality education to students at undergraduate level through constant knowledge upgradation and to strive to maintain pace with the latest and most sophisticated innovations, research and development in the field of Civil Engineering within the ambit of sustainable development.

WHO CAN APPLY?

Faculty members from educational institutions approved by AICTE. Researchers, professionals from industries/ government departments, final year PG students are eligible to attend this training programme.

MODE OF REGISTRATION

Registration is free for all participants. Participants can register for the training programme through the following link on or before 18/08/2022.
